Project Overview

Project Overview

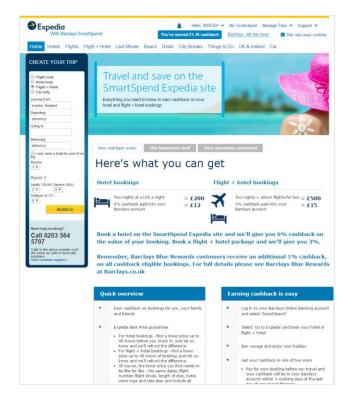

As part of the launch of Viajes Citibanamex-Expedia Travel Portal, GPS needed to implement a landing page to explain details of the program to Citibanamex customers.

Expedia shared with partner examples of program pages used by TD and Barclays.

Partner did not like the options and requested their design agency to create a mockup for the program page.

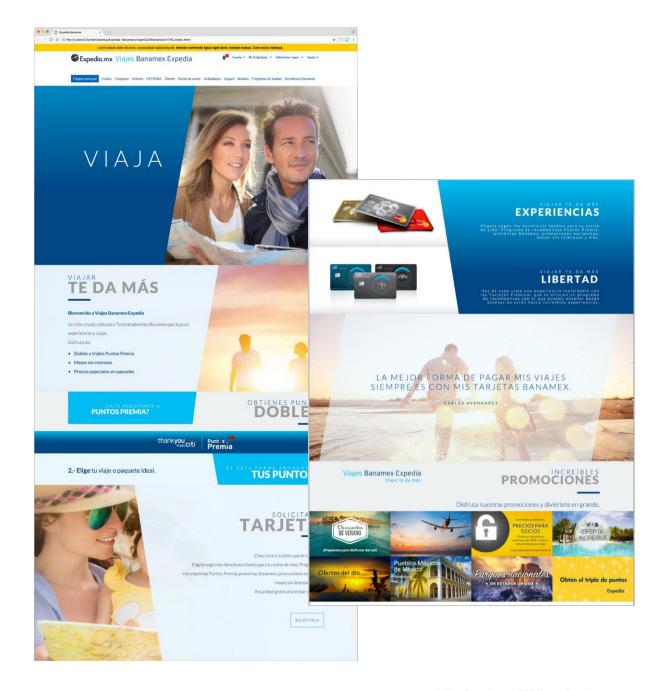

The Challenge

The Challenge

Citibanamex design was too focused on imagery and looks, and less on functionality and achieving the goals of the page.

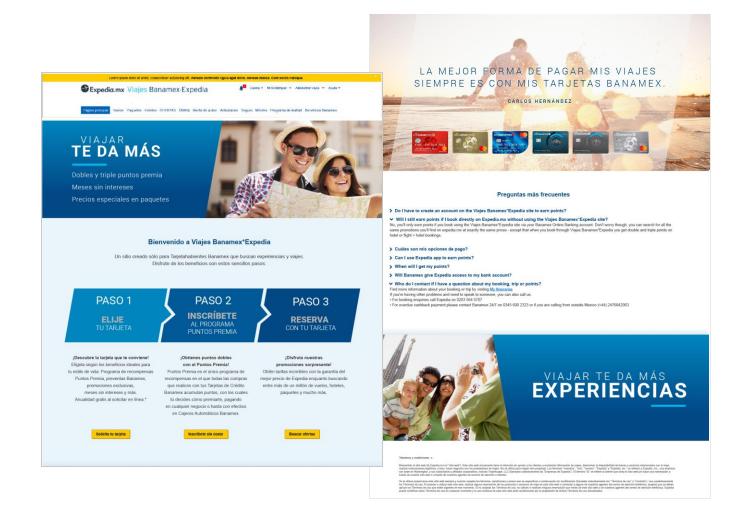

The design contained mouse overs, animations and custom formatting that were not optimized for the Expedia platform.

The Solution

The Solution

In collaboration with the partner, I worked on defining goals and design requirements for the program page. Then, using those as my guide, I redesigned the page that would work for the partner, and perform well based on the Expedia data.

My design was built on a framework that is scalable and can be applied to any other partner in the future. Expedia can now provide a better program page that is functional, clear, with visual appeal, and converts better.

The partner was pleased with the level of expertise that Expedia brought to the Citibanamex program page.
